3mm White 1 foot kit

### Chameleonz

Why have just one color of LED accent lights on your motorcycle. Now you can choose many colors: Red, Green, Blue, Purple, White, Teal, or Amber. If you want to have all colors on with a push of a button you can have colors auto rotate with this feature the LEDs slowly fades from one color to the next!

Love green lights but they are not legal in your state? No problem, just hit the button on the Chameleonz Controlz changes to another color for your ride. After you stop and park

your bike in front of your favorite hang out, change the lights back to green with the Chameleonz Controlz.

Our LEVER NUTS® can connect 1-15 wires together; so you can connect up to 15 Chameleonz pod with no soldering and no special tools. Need to add a new pod? No
